PROFESSIONAL SUMMARY

Full Stack Software Engineer with 4+ years of hands-on experience specializing in Laravel, PHP, and modern JavaScript frameworks like Vue.js and React. Proven track record of designing and developing scalable, secure web applications and RESTful APIs using clean, testable code. Experienced in collaborating with cross-functional teams, participating in Agile/Scrum workflows, and communicating complex technical concepts to both technical and non-technical stakeholders. Adept at optimizing application performance, integrating third-party services, and mentoring junior developers. Passionate about continuous learning, user-focused design, and driving impact within high-performing engineering teams.

PROFESSIONAL EXPERIENCE

Software Engineer

November 2024 - Present
Mirpur DOHS 1216, Dhaka, Bangladesh

- Developed and enhanced Dokan and Dokan Pro multi-vendor marketplace plugins for WordPress, serving 50,000+ active installations.
- Built advanced features including vendor management systems, subscription models, booking integrations, and payment gateways for Dokan Pro platform.
- Enhanced wePOS (Point of Sale) system to integrate physical retail operations with WooCommerce stores, improving inventory management and sales tracking.
- Implemented scalable solutions using PHP, JavaScript, React.js, WordPress APIs, and MySQL database optimization techniques.
- Collaborated closely with frontend developers, designers, and QA to ensure smooth feature rollouts across multi-vendor platforms.
- Participated in daily stand-ups and sprint planning sessions following Agile/Scrum methodology.

Software Engineer

July 2021 - October 2024
50/B New Eskaton Road, Dhaka 1000

- Architected and developed comprehensive ERP system using Laravel 10, Vue.js 3, React.js 18, and MySQL, serving multiple business modules including inventory, accounting, and HR management.
- Delivered custom software solutions for client requirements, reducing manual processes by 60% and improving operational efficiency across departments.
- Designed and implemented RESTful APIs and microservices architecture, ensuring seamless integration between frontend and backend systems.
- Coordinated with cross-functional stakeholders to gather requirements and deliver business-critical ERP modules.
- Documented system architecture and conducted walkthroughs for new team members.
- Mentored junior developers and conducted technical training sessions, contributing to team skill development and knowledge sharing.

Jr. Software Engineer

May 2020 - June 2021
27/2 Ram Babu Road, Mymensingh-2200

- Developed responsive web applications using PHP Laravel framework, Vue.js, MySQL, and Bootstrap, implementing MVC architecture and following coding best practices.
- Worked in a small agile team, improving team velocity by sharing knowledge and reviewing peers' code.
- Actively communicated with clients to understand project requirements and propose technical solutions.
- Contributed to full software development lifecycle including requirements analysis, system design, implementation, testing, and deployment.

EDUCATION

Bachelor of Science

Computer Science & Engineering (In Progress)
Southeast University

2022 - Present
Dhaka, Bangladesh

Diploma in Engineering

Computer Technology
Rumdo Institute of Modern Technology

2015 - 2019
Mymensingh, Bangladesh

CORE TECHNICAL SKILLS

Programming Languages & Frameworks

- PHP/Laravel
- JavaScript/TypeScript
- React.js/Next.js
- Vue.js/Nuxt.js
- Node.js/Express.js
- MySQL/PostgreSQL
- AWS/Docker
- Git/GitHub
- WordPress/WooCommerce

CERTIFICATIONS & TRAINING

PHP/Laravel Full Stack Development

Creative IT Institute, Dhaka

Redux State Management

Learn with Sumit

ADDITIONAL COMPETENCIES

- Strong foundation in Object-Oriented Programming (OOP), Data Structures, and Algorithms
- Extensive experience with RESTful APIs, and microservices architecture
- Database design and optimization: MySQL, PostgreSQL, Redis caching
- Frontend technologies: TypeScript, Redux, Tailwind CSS, Bootstrap, SCSS, and jQuery
- Software Development Life Cycle (SDLC) and Agile/Scrum methodologies
- Version control systems: Git, GitHub, GitLab with CI/CD pipeline implementation
- Cloud platforms: AWS (EC2, S3), Google Cloud Platform basics
- DevOps tools: Docker containerization, Nginx, Apache server configuration
- Testing frameworks: PHPUnit, Playwright for automated testing
- Self-motivated team player with strong analytical and problem-solving abilities
- Strong verbal and written communication skills for team and client interaction
